Abstract (en)  
[origin: EP2472178A1] The luminaire (1) has a light housing (2) for receiving light sources, operating and control devices and light transmitting or light-directing component. The lamp housing has a light emission window which is surrounded by a peripheral edge and is closed by a cover (9). The cover has a frame (10) and light-transmitting element which encloses the light transmissive element. The locking holes (13) provided in the peripheral edge (8) of the housing cooperate with the retainer springs (12) which are arranged in the frame of cover to detachably fasten on the housing.
