Abstract (en)
[origin: WO2011026535A2] The invention relates to a presentation platter (1), comprising a presentation plate (2) and a centrally arranged base (3) for supporting the presentation plate (2), in which the zone which is delimited by said base (3) extends inside the zone which is delimited by the presentation plate (2), in which the presentation platter (1) comprises one or more indirect electrical lighting elements (4) which, in the position of use of the presentation platter (1), are applied under the presentation plate (2) and which are arranged such that, in the activated state, they light at least a part of the area surrounding the presentation platter (1).
