Abstract (en)
[origin: WO2011026820A1] The present invention relates to a dishwasher rack (1) comprising more than one base wire (2) parallel to each other which form its base and hold the items to be washed, more than one support wire (3) which are mounted on the base wire (2), which extend upwards vertically or slantingly from the base wire (2) and provide the plates to be held in the suitable position for the washing and drying processes, plate holders (4) which are used in two different positions for plates with less depth and more depth, or for kitchenware items such as bowls and pans and where to the support wires (3) are secured, and which, in the first position, has a certain distance (d) between the adjacent support wires (3) such that plates with less depth can be placed and which, in the second position, has a distance therebetween wherein plates with more depth can be placed.
