Abstract (en)

[origin: WO2011026594A2] The invention relates to a method for the internal cleaning of bottle-cleaning or container-cleaning machines comprising several treatment zones designed in an interior of the machines. The containers to be cleaned move through said treatment zones during the operation of the cleaning machine or during the container-cleaning process and are treated with different cleaning or processing fluids. The internal cleaning occurs in a machine cleaning mode following the container cleaning process.
