Abstract (en)  
[origin: WO2011026848A1] The invention relates to a wall comprising: at least one first plate (11) made of thermally insulating material; at least one second plate (22) consisting of plaster; at least one spacer (30) having a predetermined length between the two ends (31, 32) thereof; a means for connecting both ends of the spacer to both the first and second plate, respectively, so as to define an inter-plate space (40) therebetween; and a mixture (50) comprising at least cement and water, the mixture being poured into said inter-plate space (40). The method according to the invention involves assembling the first panel (11), the second panel (22), and the spacer (30) so as to produce an inter-plate space (40) in which the mixture (50) is poured.
