Abstract (en)  
[origin: WO2011026750A2] The invention relates to a refrigeration device, in particular a domestic refrigeration device, comprising a storage compartment (5) and a container (7), in particular a vegetable container, separated from the storage compartment (5). At least one closure part (19; 15) of the container (7) can be displaced between an open and a closed position. When the closure part (19, 15) is in the open position, the container (7) communicates with a high pressure area (22) and a low pressure area (23) of the storage compartment (5).
