Abstract (en)
[origin: EP2290478A1] The element e.g. dial (4), has an electronic device and a power supply e.g. battery, that are integrated in the element in a manner to form an autonomic electronic module independent from a movement of a wrist watch. A control element of the electronic device is integrated in the element, and a rechargeable battery (24) is mounted on a rear surface of the element. The electronic device is composed of a lighting device (20), where the lighting device and a photovoltaic cell (18) are housed in a thickness of the element.
