Abstract (en)
[origin: WO2011025549A1] Methods and devices to monitor an analyte in body fluid are provided Embodiments include continuous or discrete acquisition of analyte related data from a transcutaneously positioned in vivo analyte sensor automatically or upon request from a user Embodiments include wirelessly communicating analyte level information from on body electronics device to a second device such as a display device, and an analyte sensor comprising one or more storage devices such as non-volatile memory and other discrete components
