Abstract (en)

[origin: EP2474344A1] The wing chun training device (1) comprises a rod unit (2) in the form of an arm unit (3) or a leg unit (4). A support unit (5) has the form of a mounting plate which is provided with multiple receiving elements (52) that receive the connecting element. The rod unit is extended from the support unit. Independent claims are also included for the following: (1) a method for operating wing chun training device; and (2) an assembly with a padding element.
