Abstract (en)
The shutter has lamellas (2) extending parallel at a distance (4) relative to each other. The lamellas are fastened to a support (3) by screws, rivets, or linear clip connections in form-fit and material-engagement manner. The support is made of flexible, transparent net-like material e.g. plastic or metal. The support completely covers a rear side of the lamellas and provided with a coating for sun protection, glare shield or heat protection. Strips forming the support are arranged transverse to a longitudinal extension of the lamellas. An end lamella (1) is provided at an end of the shutter.

Abstract (de)
Eine Vielzahl parallel und abständig zueinander verlaufende Lamellen (2) aufweisender, aufwickelbarer Rollladen, wobei die Lamellen (2) an einem aus einem flexiblen, lichtdurchlässigen Material bestehenden Träger (3) befestigt sind.
