Abstract (en)  
[origin: WO2011029599A1] The invention relates to a guide device in a system for shaping material (1), comprising bars (3a, 3b) which are arranged parallel to each other and which can be adjusted on both longitudinal sides (2a, 2b) of the material (1). Said bars (3a, 3b) can be pressurised by respective adjusting devices (4). The invention is characterised in that at least one adjusting device (4) comprises at least two pressure applying devices (4a, 4b) which are connected in series.
