Abstract (en)

[origin: WO2011083118A1] The invention relates to a fastening device for a children's vehicle seat (1), comprising two connecting elements (4), which are suited and designed to cooperate with anchoring means arranged on the vehicle for fastening a children's seat (1) to the vehicle. According to the invention, the connecting elements (4) are designed or disposed on the two ends or end regions (31, 32) of a connecting tube (3) having a curved design, and the connecting tube (3) comprises a section (33) between the ends thereof that can be rotatably mounted to a children's seat (1) or a part that is connected, or can be connected, to a children's seat (1). The invention further relates to a children's vehicle seat comprising such a fastening device.
