Abstract (en)

[origin: WO2011031085A2] Disclosed are a passenger airbag, a method of manufacturing the same, and a method of deploying the same. The airbag has a simple structure so that the airbag is easily manufactured and waste parts of a fabric are significantly reduced. The position of an inflator is varied such that a part of the airbag corresponding to the head or the body of the passenger is inflated with a greater volume.
