Abstract (en)

[origin: WO2011029606A2] The invention relates to solar systems comprising photovoltaic conversion panels (14) that are mounted in rows (12). According to the invention, flexible photovoltaic conversion strips (34) are installed in the passages (32) between the rows (12). The electrical output power of said conversion strips (34) is added to the output power of the conversion panels (14). Such conversion strips (34) are easy to install and dismount using a special installation vehicle (42).
