Abstract (en)
[origin: EP2476357A1] The arrangement has an engaging connection (77) formed for formation of a connection device (68) attached to a free end (76) of a handle tube (36) and between a connection end (75) of a supporting bar (66) and the handle tube. The engaging connection is formed such that the connection end and the handle tube enclose an acute angle. The connection end is inserted through an inlet opening (78) into the handle tube such that an axial supporting end (79) of the supporting bar is supported at a supporting stop (81) formed by a tube inner wall (80) of the handle tube.
