Abstract (en)

[origin: EP2476816A2] The profile has an angle profile part comprising two attachment brackets (1), where the attachment brackets are mounted on a step tread and a step riser and connected to each other at right angle. Corner edges of floor mat elements are fixed on contact surfaces of the attachment brackets. An edge protection strip (7) is placed at an external corner of the angle profile part and arranged between the corner edges of the floor mat elements, where the corner edges are turned toward each other. A recess (13) is formed in the strip for inserting into a rubber-like anti-slide insert.
