Abstract (en)  
[origin: EP2476856A2] The sliding door system (1) comprises a door wing (2) and a sealing device (12) which is provided for sealing the door wing. An actuating element is provided for working with a triggering device, where the actuating element is deflected in the movement direction of the door wing by acting force component of the return device through a lever or a driver in a direction perpendicular to the direction of the movement of the door wing.
