Abstract (en)
[origin: WO2011034942A1] Chest protectors (e.g., for use during motocross, or other high-speed motor sports) for protecting a rider from injury are provided. A chest protector is made with removable protective attachments that provide flexibility and has a low neckline, or removable neck attachment, to facilitate use of the chest protector with removable neck braces. In some implementations, the neck brace is be attached to the chest protector, e.g., using hook and loop fasteners.
