Abstract (en)
[origin: WO2011032682A1] The invention relates to a machine tool for machining workpieces, comprising a dimensionally rigid machine base (1), a traveling stand (4) that can be moved on the machine base (1), a machining unit (9, 10) that is mounted movably on the traveling stand (4) and has at least one cutting tool and a supporting structure (12) provided on the front longitudinal side of the machine base (1) for fastening at least one workpiece. According to the invention, the supporting structure (12) has a dimensionally stable frame (11), the longitudinal member (13, 14) of which arranged at a transverse distance delimit a clear space for the chip clearance, and wherein different workpiece carriers (30, 35) can be mounted at or on the frame.
