Abstract (en)

[origin: WO2011032613A1] The invention relates to an arrangement (10) of a bracket (12) on a carrier (14) of a passenger-car body, comprising a carrier (14), in particular a longitudinal carrier (14), having an upper flange (16) and a lower flange (18), and comprising a bracket (12), in particular a shock-absorber strut bracket (12), by means of which at least one chassis component of the motor vehicle, in particular a shock-absorber strut, can be supported on the carrier (14), wherein the bracket (12) is supported at least on the upper flange (16) and on the lower flange (18) of the carrier (14).
