Abstract (en)
[origin: WO2011033051A1] The invention relates to a large-volume packaging container (2) made of flexible material, preferably of polypropylene fabric, having a rectangular contact area (3) on which the packaging container (2) is supported in the transport position and four shell surfaces (4) and a cover surface (5) for transporting bitumen, wherein the contact area (3), shell surfaces (4) and cover surface (5) are each connected to the neighboring surface(s) by seams, characterized in that each shell surface (4) has the shape of a rectangle and at least one first side length (10, 11) of the contact surface (3) is more than 40%, preferably more than 50% and particularly preferably more than 100% longer than the height (H) of the packaging container (2).
