Abstract (en)  
[origin: WO2011032652A1] The invention relates to an aerator for introducing a gas or gas mixture into a liquid and to a method for aerating liquids. The aerator according to the invention comprises a cavity, a gas inlet for directing a gas into the cavity and two or more surfaces that are or can be pressed against one another in a form-fit such that a gas that is forced into the cavity by means of the gas inlet escapes through gaps that form between the compressed surfaces.
