Abstract (en)
[origin: WO2011032810A1] The invention relates to a moldable anchor rail (11) having a rail body (12) and anchor elements (21) that can be fixed onto the rail body (12). The rail body (12) has a receiving chamber (13) extending in the longitudinal extension of the rail body (12) for a fastening element (6) which is accessible via an assembly opening (15) bordered by edges (14) and is bordered laterally by opposite lateral walls (16) facing one another. Each of the lateral walls (16) has a crack initiator means (26).
