Abstract (en)  
[origin: WO2011032774A1] The invention relates to an actuator for switching a switching unit, said actuator comprising a display having a display surface (14) and an illumination element. The invention is characterized in that the illumination element is designed as a LED (10), wherein the light of the LED (10) is guided through a light conductor (7), which is arranged directly above the LED (10) in the actuated state.
