Abstract (en)
[origin: EP2478810A2] The basin has a discharge opening arranged in a recess of a tank bottom. A discharge equipment is connected to the discharge opening. A metallic injection molded cover (5) is arranged over the discharge opening. The cover comprises an enameled upper side and exhibits a shape adapted to the recess. The cover rests directly on a lower side of the recess of the tank bottom and/or the discharge equipment and is designed as a single-piece, dimensionally stable and partially enameled metal part. A tub structure having the tank bottom is formed from an enameled sheet.
