Abstract (en)

[origin: EP2479104A1] The watercraft (1) has a platform lift (4) arranged at a tail area (2.1) of a hull (2) and comprising a lifting device (6) for lifting and lowering a platform (5) in lifting and lowering direction (A) and a shifting device (7) for longitudinal shifting of the platform. The shifting device is integrated in the lifting device that comprises U-shaped or rectangle profiles (8), where the shifting device comprises a flat profile and bars. The flat profile and the bars are arranged in cavities and/or slots of the U-shaped or rectangle profiles. The shifting device is driven with a drive link.
