Abstract (en)
A container (10) comprising a bottom (12), a wall (13), an opening (14) and a rim (15) integrally formed with the wall (13), wherein the rim (15) comprises an exterior first wall portion (19), a first bend (20), an interior second wall portion (21), a second bend (22) and a sealing portion (16) to be engaged by a sealing wall (18) of a lid (11) to seal the container (10), wherein the first bend (20) extends radially inwards from the exterior first wall portion (19) to the interior second wall portion (21), and wherein the second bend (22) extends radially inwards from the interior second wall portion (21) to the sealing portion (16), so that the interior second wall portion (21) at least partially extends between the exterior first wall portion (19) and the sealing portion (16) towards the bottom (12) of the container (10).
