Abstract (en)

[origin: EP2479375A2] The method of venetian blinds control, in particular window venetian blinds, where rotating of the venetian blinds (3) is performed by motorized device (1), which fixtures (131, 132) of the drive unit (13) are attached to loops of draw-links (21, 22) of the control (2), while opening/closing of the venetian blinds (3) is performed by the movement of both fixtures (131, 132). The device (1) incorporates the electronic control unit (1), which processes signals of the switch (111) and provides movement of fixtures (131, 132) of the drive unit (13) with attached draw-links (21, 22) of the control (2) of the venetian blinds (3) by means of the motor (12).
