Abstract (en)

[origin: EP2479510A2] The fitting (2) has a valve housing (23) for receiving an adjusting- or valve device i.e. thermostat- or control valve (3). A supply pipeline (25) is provided for supplying a heating medium to the valve housing and to the adjusting- or valve device. Another supply pipeline (24) is connected with the valve housing. The latter supply pipeline supplies a partial stream of the heating medium from the valve housing to inlet points (45) downwardly arranged at height in a wall-sided heating element (11). A distribution piece consists of plastic mass and channels separated from each other.
