Abstract (en)
A solar cell module comprises a glass substrate, a first sealing resin layer, a solar cell connected to a tab wire, a second sealing resin layer, and a protective sheet, which are laminated. The second sealing resin layer is formed from a blend polymer of a thermoplastic polyurethane resin having an ester-type polyol unit and a thermoplastic polyurethane resin having an ether-type polyol unit. The blend ratio of the thermoplastic polyurethane resin having the ester-type polyol unit to the thermoplastic polyurethane resin having the ether-type polyol unit in the blend polymer is 20:80 to 50:50 by mass.
