Abstract (en)

[origin: EP2301685A1] The controlling method involves providing a treatment system with an upstream system component (2) and a downstream system component (3). The components directly run through a rolling stock (1). The components are formed as a production line. A control device (10) is provided for the treatment system for a section. Independent claims are also included for: (1) a computer program with a machine code; and (2) a controlling device for a treatment system.
