Abstract (en)
[origin: WO2011035962A1] The invention relates to mixtures containing aluminosilicate binders that can be activated by alkali, characterized in that the mixture contains organosiloxane compounds. The invention further relates to the use of the organosiloxane compounds for reducing shrinkage in aluminosilicate binders that can be activated by alkali and to the use for the hydrophobization in aluminosilicate binders that can be activated by alkali. The invention also relates to grout, fillers or coatings containing the mixtures according to the invention.
