Abstract (en)
[origin: WO2011036170A1] The invention relates to a through-passage roofing tile (1) comprising at least one lower part (4) that has an inlet opening (14) and a sealing surface (31). A connecting part (7) is arranged below the lower part (4), said connecting part likewise having a sealing surface (22) which lies below the sealing surface (31) of the lower part (4). Both sealing surfaces (22; 31) face each other. The lower part (4) and the connecting part (7) are interconnected by fixing means (19, 20). A sarking membrane (44) lies at least partly between both sealing surfaces (22; 31).
