Abstract (en)
[origin: WO2011035796A1] A method as well as a transmitter, a receiver and an adaption layer allowing transmission and/or reception of payload data with a high data rate is described. A high data rate platform (502, 504) and a low data rate platform (506, 508) are provided. The payload data is transmitted and/or received via the high data rate platform (502, 504), while the signaling data associated with the payload data is transmitted and/or received via the low data rate platform (506, 508).
