Abstract (en)

[origin: EP2481524A1] The device (1) has a process chamber (2) in which to be processed workpiece (3) is placed. A cooling device (5) is provided in a separate chamber (4) for cooling the process chamber. An inlet opening and a discharge opening are provided between the process chamber and separate chamber. A vaporizer is provided to remove the air/moisture inside the process chamber.
