Abstract (en)
A shaving machine (100) having a thicker grid (110) than standard machines, that protect the skin from damage and ensure the keeping of religious practices related to shaving. The thicker grid is achieved by either replacing a basic grid of the machine or mounting an additional grid (119) thereupon. The invention further provides kits of grids in different thicknesses to allow a user personalize the performance of the shaving machine. The invention further provides kits of mountable grids to be added to the basic grid, in different thicknesses to allow a user personalize the performance of the shaving machine.
