Abstract (en)

The printing press control system has an electronically controlled and computer-aided neuro-fuzzy module (10) for electronic or electro-optical determination of printing machines and actual data of the printing machine components (2,3,4,5,6,7a,7b,8). The control system operates based on the neural network (15). A mobile control station (9b) such as an i-pad(RTM: tablet computer developed by Apple Company) or tablet personal computer is provided in the control system.

Abstract (de)

Druckmaschinenleitstand zur Steuerung einer Druckmaschine, insbesondere einer Rollenrotationsdruckmaschine.
