Abstract (en)
An inserting system has one or more postal item feeders, an envelope feeder, an inserting station for inserting postal items into envelopes in an inserting position and a mailpiece holder for holding envelopes with postal items inserted therein. A tower portion of the inserting system projects upwardly of the inserting station wherein the holders associated to said feeders are connected to the tower portion and arranged on opposite sides of the tower portion. The inserting station projects horizontally relative to the tower portion under at least one holders of one of the feeders. The mailpiece holder projects horizontally relative to the tower portion under one of the holders on a side of the tower portion opposite the inserting station.
