Abstract (en)
[origin: EP2481683A1] The carrier has a blank made of painted or unpainted cardboard e.g. craft cardboard and recycled cardboard, or foldable sheet material for wrapping a group of bottles or containers. Longitudinal flaps (25, 26) and/or transverse flaps (27, 28) are linked to longitudinal sides and/or to transverse sides of an amplification wall (24). Amplification flaps (38, 39) are punched on the amplification wall at borders of two rectangular engagement holes (34, 35). The amplification flaps are hinged against a bar (49) of the amplification wall limited by the holes for forming an amplified grasp portion.
