Abstract (en)

[origin: EP2482377A1] The invention relates to a filter for radio frequency signals comprising a first resonator (RC1 and first coupling means (CP1) for coupling the radio frequency signals between the outside of the filter (F1) and the first resonator (RC1), the first resonator (RC1) comprises a first resonator rod (RR1), and the first resonator rod (RR1) is part of a supply line for providing RF signals from an input of said filter to said first coupling means (CP1) or is part of an output transfer line for providing RF signals from said first coupling means (CP1) to an output of said filter.
