Abstract (en)
[origin: WO2011041454A1] A gemstone setting for gemstones that present as a single stone on the viewing face or top including a plurality of anchor gemstones and a larger touchstone wherein the gemstones are held in place with no metal from the setting visible between the gemstones. The gemstones are positioned in the setting with the lower girdle facets of the anchor gemstones overlapping and contacting the upper girdle facets of the touchstone so that at least one of the contact points between the touchstone and an anchor gemstone forms an angle and helps to hold the touchstone in place.
