Abstract (en)  
[origin: WO2011039543A2] A rucksack comprises a load-carrying bag having a rear wall, and a harness arranged to permit the load-carrying bag to be carried by a user with the rear wall adjacent the back of the user. The rear wall includes a plurality of projecting padded panels. The rucksack further includes a chassis shaped such that in use each padded panel contacts the back of the user. The rucksack may alternatively, or additionally, include a pair of attachment members on opposed sides of the rucksack, which are connected together through or adjacent the rear wall.
