Abstract (en)

[origin: WO2011039435A1] The invention relates to a shoe (1) comprising between one and four wheels (7, 8) which, for walking, are arranged horizontally in specific recesses in the sole (2) and which, for rolling, are pivoted about longitudinal axes (15) and locked in a vertical position using a single lock, such that they project downwards from the sole and convert the shoe into a roller skate.
