Abstract (en)  
[origin: WO2011038711A1] The invention relates to a paint spraying device (1) comprising an operator unit (2) that is arranged at a first end (A) of the paint spraying device (1), and a spray head (3) that is arranged at a second end (B) of the paint spraying device (1). The operator unit (2) includes an air connection (5) for an air duct (6), a guide (7) for a paint duct, (8) via which paint (9) is supplied to the spray head (3), a signal transducer (S) for generating a control signal (CS), and a control connection for a control line. A barrel (4), through which an air stream (11) is conducted from the operator unit (2) to the spray head (3), is arranged between the operator unit (2) and the spray head (3).
