Abstract (en)

[origin: WO2011038960A1] The invention relates to a device (10) for forming, filling and closing bags provided with respectively one pouring device, comprising a device (23) for forming a tube (25) from at least one material web (12), a filling device (28) for filling the tube (25) and/or the bags (5) and a cross-seam sealing and separating device (33) for separating respectively one bag (5) from the tube (5). According to the invention, said device (23) for forming the tube (25) comprises a forming device (24) which forms the tube (25) from one single material web (12) and the filling device (28) fills the tube (25) with the filling material over the entire cross-section of the tube (25) and one outer part (4) of the of the pouring device (1) is joined to the material web (12) after forming the tube (25).
