Abstract (en)

[origin: WO2011039199A1] A security feature, for inclusion in a pulp from which a security paper (50) is to be made, is a sheet (10). The security feature includes a first pigment that fluoresces in response to illumination by UV light of a first, longer, wavelength, and a second, different, pigment that fluoresces in response to illumination by UV light of a second, shorter, wavelength. The sheet (10) is divided into a plurality of regions (20). The first pigment is in a first region, and the second pigment is in a second, different, region.
