Abstract (en)
[origin: WO2011043653A1] The invention relates to a spud-handling device (11) for manoeuvring a spud (3) between a substantially vertical position and a substantially horizontal position, the spud-handling device comprising: - a lifting device (9) which is fixedly connected to a lifting frame (45) in order to move the spud in its vertical position substantially vertically between a highest and a lowest position, - a tilting frame (24) which is connected to the lifting frame in order to determine a tilting axle (13) about which the spud can be tilted, - a tilting device (10) which is connected to the tilting frame in order to tilt the spud about the tilting axle, in which the tilting device is designed so as, in use, to engage with the lifting device for tilting the spud.
