Abstract (en)

[origin: WO2011038832A1] The invention relates to a device for assembling a window sash having an integrated insulating glass pane. The window sash has a frame (51) made from plastic hollow profile section (21), wherein on the inner face (23) thereof the frame (51) has two webs (26, 27) parallel to each other, which are adhesively secured to two glass panes (52, 53) that are held spaced apart by the two webs (26, 27). The device has a horizontal conveyor (62), which is provided, so as to be vertically adjustable, on an underframe (55).
