Abstract (en)

[origin: WO2011039349A2] The invention relates to a toe-in actuator (16), in particular to a relay for an electric starter device in a combustion engine. The toe-in actuator (16) comprises a housing (156), in which a movable armature (168) and an armature return path (171) are accommodated. Noise-reducing attenuation elements (224, 228, 238, 240, 244) are provided at least on the armature (168) and/or on the armature return path (171).
