Abstract (en)

[origin: WO2011039089A1] The invention relates to a method for operating a household appliance, said household appliance comprising at least one interruptible network connection to a supply network, an interference filter (Z10) having at least one capacitance, and at least one discharging element for discharging the at least one capacitance. When the network connection is interrupted, the at least one discharging element (M3) is switched on in order to discharge the at least one capacitance. The household appliance is designed to carry out the method.
